		Mark Allocation	Mark
Prediction	▪ Write a prediction which relates length and force	1	
Diagram	▪ All equipment is labelled, including sizes or types where appropriate. ▪ Diagram is neat, drawn in pencil, of suitable size, stylised and two dimensional ▪ Diagram has suitable caption (eg Figure 1: …)	3	
Results	▪ Table title relates variables ▪ Headings include units where appropriate ▪ Average calculated for repeat trials	3	
Graph	▪ Graph title relates variables ▪ Graph type is appropriate for data ▪ Axis are correct orientation and labelled, including units; Graph is appropriate size and scale	3	
Variables	▪ Independent variable is identified ▪ Dependant variable is identified ▪ 1-3 controlled variables identified ▪ At least one uncontrolled variable identified	4	
Discussion	▪ Results summarised (overall trend) ▪ Explains results in terms of mechanical advantage ▪ Difficulties or sources of error identified ▪ Suggestion for improvement	4	
Conclusion	▪ Summary of findings ▪ Prediction correct or not	2	
		Total /20
