

# Landscapes and Landforms

## LEGO and Visual Representations

### INSTRUCTIONS

**Note:** You will complete this activity in a group.

1. Your group will use the Lego kit provided to create the landform you have been assigned. You will have 20 minutes to complete this task.
2. You must use the paper provided to label at least FIVE key features of your landform/landscape. You may use your device and the internet if you need to.
3. Once you have completed your model, place it on the cardboard/base plate ready for display and evaluation!
4. A photograph will be taken of your model and uploaded into a Google Doc, and possibly displayed elsewhere!
5. Students from each group will examine the models from each another group and write a constructive observation and evaluation. You will be given 20 minutes to complete this part of the task.
6. Finally, if time permits, each group discusses their model and learning in front of the class. Teacher to project Google Doc Table onto whiteboard.

Group Number	Landscape	Features that you can see	Evaluation of model
1	Mountain		
2	River		
3	Valley		
4	Plain		
5	Plateau		
6	Island		

Group Number	Landscape	Features that you can see	Evaluation of model
7	Lake		
8	Ocean
