

# WATER SCARCITY

## Visualising Water

Water is a vital resource for all living things, but it is in limited supply. Water resources are difficult to manage. As the world's population continues to grow at a rapid rate, the demand for water and the way we manage it are becoming increasingly important issues. Water can become scarce; this means there is less available or harder to find.

Inspect the image you have been given and respond to the following:

1. What do you see?
2. What do you think?
3. What do you wonder?

### **Extension:**

Select one point from your *wonder list* and research the answer
