

Feeding the future world population

Student: Class: Due date:

Examine Table 1: Total world population in 1960, 2005 and estimated for 2050.

Year	1960	2005	2050
Population	3.0 billion	6.5 billion	9.6 billion

1. Graph the figures for 2005 and 2050 in the space below.

2. Complete the sentence below using statistics from Table 1.

The world's population was**3.0**..... billion during 1960. Forty-five years later this figure has increased to**6.5**..... billion. By 2050, it is predicted that there will be**9.6**..... billion people to feed in the world.

3. Suggest a definition for the word 'hunger'.

Hunger means that a person does not have access to enough food to meet their basic nutritional needs over an extended period.

4. Suggest two ways that hunger could affect your performance at school.

A person who is suffering the effects of hunger would not be able to concentrate on their schoolwork. They might be lethargic and fall asleep in class or be unable to participate in sporting activities.
