## Cookie Erosion

Erosion is the movement of soil and sediments from one location to another location. Wind, water, ice, and human activity are agents which cause erosion to happen.

Prediction/Hypothesis

Which tool(s) do you think will cause erosion? Why?

|                 | Q-Tip | Toothpick | Water |
|-----------------|-------|-----------|-------|
| After 1 minute  |       |           |       |
| After 5 minutes |       |           |       |

Conclusion

Which tool caused the GREATEST amount of erosion? How do you know?

Which tool caused the LEAST amount of erosion? How do you know?

Was your prediction correct or incorrect?
