TASK 3 (COGNITION): TRAINING MANUAL FOR BEHAVIOUR MODIFICATION

TASK 3: Behaviour modification pamphlet for parents for ADHD

You are a psychologist giving a clinical consultation for parents of a child. This child has ADHD and often acts anti-socially at school and at home. She/he also suffers from a severe phobia of travelling in cars and the parents are finding it is hindering the families normal day to day activities.

Your presentation should include:

- an introduction, including the purpose of the consultation and a brief description of the child and her/his current behavioural problems and target behaviours (7 marks)
- A brief description of background information on three theories and processes of learning, including
 - classical conditioning
 - operant conditioning
 - observational learning (21 marks)
- a step-by-step guide of token economies that would help parents of a child with ADHD
- A step-by-step guide of systematic desensitisation OR cognitive behavioural therapies that would help the child with her/his phobia (12 marks)
- Conclusions about the effectiveness of each training method by referring to its strengths and/or limitations (6 marks)
- a list of references using APA conventions in your powerpoint (3 marks)
- Appropriate presentation and communication (6 marks)

The information in your presentation should be presented logically. The text and graphics should be set out effectively and professionally to communicate to your audience. The communication and delivery should also be appropriate.

What you will be handing in:

- transcript
- slides
- video of your presentation (15 minutes)
