

Weathering, Erosion, and Deposition

Think about what you have seen and learned about erosion to complete the chart below.

	Weathering	Erosion	Deposition
1. The roots of a plant grow in the cracks of a sidewalk. As the root grows larger the cement begins to crack.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2. A delta is formed at the mouth of a large river.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3. A rabbit burrows into the crack of a large rock and widens and splits the rock.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4. The dropping of sediment to a new location	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5. Dust and sand are blowing in the air during a windstorm.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
6. Ice melts in the crack of a large boulder and carries away loose sediment.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7. Due to rain, the paint on an outside bench begins to crack.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
8. Blowing sand comes to a rest forming a sand dune.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9 The moving of weathered sediment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10. The wearing down or breaking of rocks	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
