Directions: Answer the questions. Cut along the dotted lines and paste this page into your notebook.

ACTIVITY

LANDFORM Landscapes

Teacher Instructions

Materials needed:

- piece of thick cardboard, shoebox, or another disposable surface to create their landform on.
- Salt dough clay
- Toothpicks
- Masking Tape

In this activity, students will solidify what they have learned about landforms by creating their own landform landscape. They can choose their favorite landforms and build a landscape out of salt-dough clay.

Before the clay hardens, have students mark label their landforms with a toothpick that has a masking tape tag on it.

After the clay hardens, they can paint their landforms.
