

# Year 10 Psychology

## Reliability of Memory Research (Weighting 15%)

### Part A

<b>Name:</b>		
<b>Class:</b>	<b>Due Date:</b>	<b>Teacher:</b>

A psychologist known as Elizabeth Loftus, has been quite concerned with how eyewitness accounts can be distorted by subsequent misleading information. Statistics have shown that in the USA alone 69% of DNA exonerations have involved eyewitness misidentification, making it the leading contributing cause of these wrongful convictions.

1. Research Elizabeth Loftus and identify what her experiments were focussed on. (2 marks)

---

---

---

2. Research both of Elizabeth Loftus's experiments and outline them below (including aim, method, and conclusion) (6 marks)

Experiment 1:

---

---

---

---

---

---

Experiment 2:

---

---

---

---

---

---

---

3. Research two additional memory experiments and provide their aim and method below (4 marks)

Experiment 1:

---

---

---

---

---

---

---

---

---

---

Experiment 2:

---

---
