

## Year 10 Psychology

### Mental Disorders Presentation (Weighting 15%)

<b>Name:</b>		
<b>Class:</b>	<b>Date:</b>	<b>Teacher:</b>

For this task you will be working individually to create a presentation on a mental disorder.

You will be given class time to research and prepare your presentation.

The presentation should be 2-3 minutes long. You may either do this as an in-person presentation, an animated short or using text to voice (other options may be discussed with your teacher). There is also the option to present to the teacher individually rather than in front of the class if preferred.

Examples of these disorders include, but are not limited to: Depression, Schizophrenia, Bipolar or OCD. Your presentation should also include the following points:

- Identify and provide a description of the disorder; identifying whether it is a mood, psychotic, or anxiety disorder.
- Identify the symptoms of the disorder.
- Describe the treatment of the disorder of your choice, and the social and technological factors that have influenced these treatments.
- Provide the Australian and global statistics and trends for the mental disorder.
- Provide a case study of the disorder.
- References (Harvard format).

	4	3	2	1	0
<b>Description of disorder</b>			Description complete and accurate	Description includes but 1-2 missing key points.	Description not present or highly inaccurate.
<b>Symptoms of the mental disorder</b>			All symptoms listed correctly.	Symptoms listed but 2-3 mistakes present.	Symptoms not listed or have 4+ mistakes.
<b>Disorder treatments.</b>	All treatments listed and described accurately. Social and technological factors described accurately.	All treatments listed and described accurately or contains 1 mistake. Attempt at describing social and technological factors.	Some treatments listed and described accurately or contains 2-3 mistakes. An attempt made to describe social and technological factors.	Some treatments listed and described accurately.	No treatments listed or described accurately, or 5+ mistakes made.
<b>Disorder statistics</b>			Both Australian and global statistics and trends presented.	Only one statistic presented or no trends identified.	No statistics or trends identified, or multiple mistakes made.
<b>Case study</b>			Case study presented accurately.	Case study is presented with 1-2 errors.	Does not contain a case study, or multiple mistakes made.
<b>Clarity of presentation</b>			Presented clearly.	Occasionally hard to understand presentation.	Not presented or unable to understand presentation.
<b>Creativity</b>	Presentation complete, attractive, creative and easy to understand.	Presentation complete and easy to understand but lacks creativity.	Presentation complete but hard to understand.	Attempt at a presentation, but incomplete.	No presentation created or submitted.
