

Name: ANSWER Teacher: KEY

Mark: /41

Percentage: %

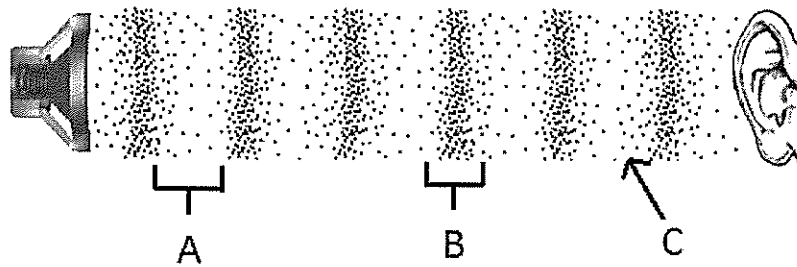

SECTION A:

MULTIPLE CHOICE

(15 marks)

Select the most correct answer for each question below.

1. Letter A in the diagram below represents:

- (a) Compression.
 (b) Sound wave.
 (c) Refraction.
☒ (d) Rarefaction.

2. Choose the correct definition for 'frequency'.

- (a) Closely packed particles vibrating in a region.
☒ (b) The number of waves passing a point every second.
 (c) The distance from one peak of a wave to the next.
 (d) The number of waves passing a point every minute.

3. Sound travels the fastest through:

- (a) Gas.
 (b) Steam.
 (c) Liquid.
☒ (d) Solid.

4. Choose the correct definition for 'conduction'.

- (a) Transfer of heat in a liquid or gas due to less dense, warmer matter rising and denser, cooler matter falling.
☒ (b) A method of heat transfer where heat is passed through the vibration of particles.
 (c) Movement of heat in the form of electromagnetic waves.
 (d) A substance that allows heat to pass through it.

ANSWER KEY

5. Choose the correct definition for 'heat'.

- ☒ (a) A form of energy that describes the total energy of all particles within an object.
- (b) The measure of how quickly the particles in a material are moving.
- (c) The average kinetic energy of particles in a material.
- (d) A method of heat transfer.

6. Choose the correct statement about sea breezes.

- (a) Air cools and drops down on the land from over the ocean.
- ☒ (b) A sea breeze occurs during the day.
- (c) Warm air rises up from over the ocean.
- (d) A sea breeze occurs at night.

7. Choose the correct definition for 'radiation'.

- ☒ (a) Movement of heat in the form of electromagnetic waves.
- (b) A material that does not conduct heat.
- (c) A method of heat transfer where heat is passed through the vibration of particles.
- (d) Transfer of heat in a liquid or gas due to less dense, warmer matter rising and denser, cooler matter falling.

8. Choose the correct definition for 'temperature'.

- ☒ (a) A measure of the average kinetic energy of particles in a substance.
- (b) An instrument used to measure temperature.
- (c) A measure of the average potential energy of particles in a substance.
- (d) A measure of the kinetic energy of particles in a substance.

9. Choose the correct definition for 'wavelength'.

- (a) The number of waves passing a point every second.
- (b) The distance from one wave to the next.
- ☒ (c) The distance from one peak of a wave to the next.
- (d) The number of hertz in a wave.

10. The length of time a sound is heard is known as:

- ☒ (a) Reverberation.
- (b) Echo.
- (c) Vibration.
- (d) Frequency.

11. Choose the material that would have the slowest speed of sound.

- (a) Steel.
- ☒ (b) Air (at 0°C).
- (c) Water.
- (d) Glass.

12. Select the ending for the following sentence. Soft materials:

- (a) Reflect sound.
- ☒ (b) Absorb sound.
- (c) Transmit sound.
- (d) Increase echo in a room.

13. Choose the correct function of the ossicles.

- ☒ (a) Three tiny bones that magnify vibrations.
- (b) Filled with fluid and gives us our sense of balance.
- (c) Has hairs to trap dust and dirt.
- (d) Funnels sound into the ear canal.

14. Choose the correct function of the semicircular canals.

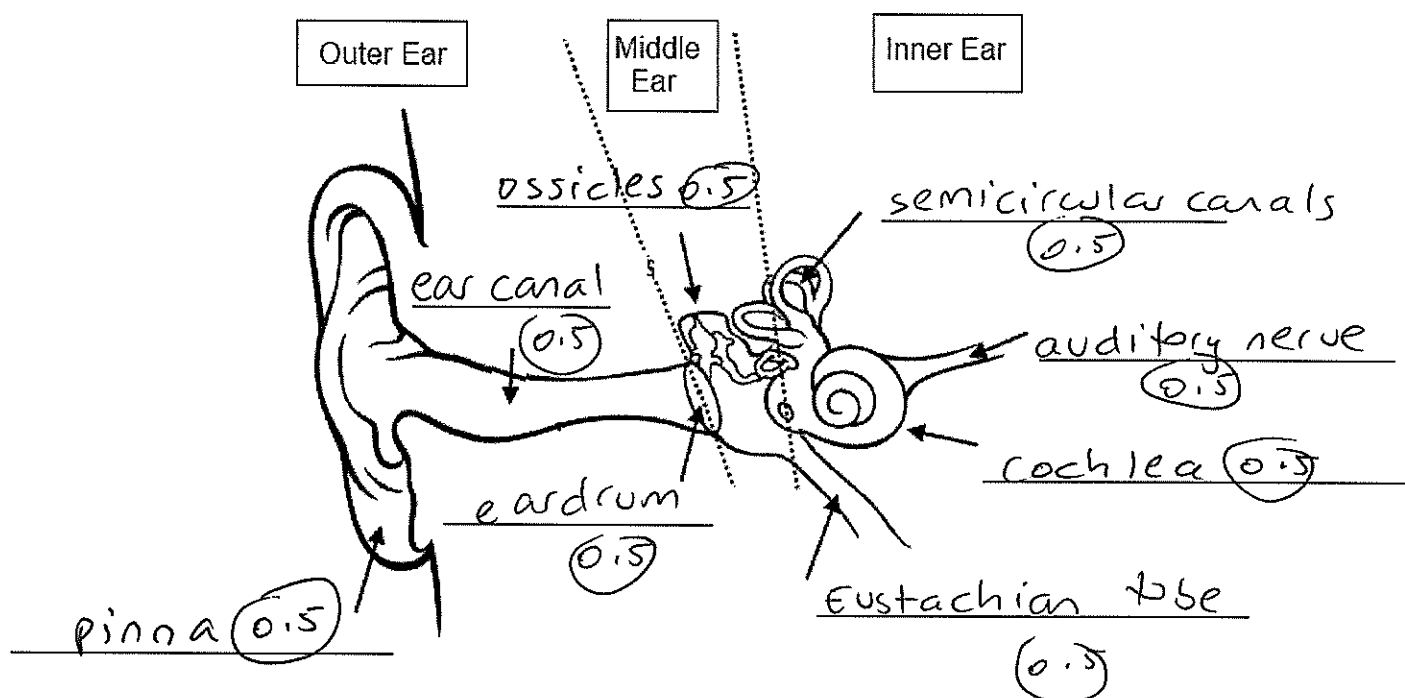

- (a) Carries electrical impulses to the brain.
- (b) Filled with fluid, has hairs that pick up vibrations and converts them into electrical impulses.
- ☒ (c) Filled with fluid and gives us our sense of balance.
- (d) Funnels sound into the ear canal.

15. Choose the correct function of the cochlea.

- (a) Has hairs to trap dust and dirt.
- (b) Carries electrical impulses to the brain.
- ☒ (c) Filled with fluid, has hairs that pick up vibrations and converts them into electrical impulses.
- (d) Three tiny bones that magnify vibrations.

1. Label the diagram of the ear below.

(4 marks)

2. Fill in the table below.

(6 marks)

Part of ear	Function
Pinna	Funnel's sound into the ear canal. (1)
Eustachian tube	Joins middle ear to nose & throat (1) Balances air pressure (1)
Auditory nerve	Carries electrical impulses (1) to the brain (1)

3. List the three ways that heat can be transferred (moved). (1.5 marks)

Radiation, convection, conduction

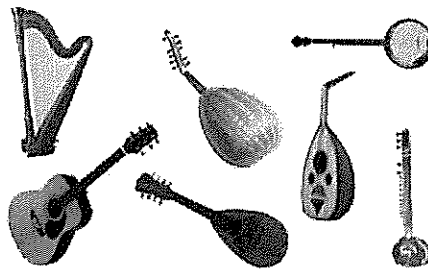

4. State the name of an animal that uses ultrasounds. (0.5 marks)

Bats

5. State the name of an animal that uses infrasounds. (0.5 mark)

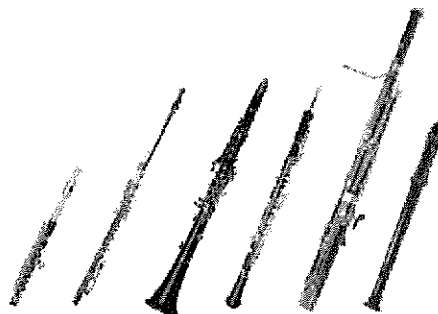

Elephants

6. Explain how the group of instruments below produce sound. (2 marks)

vibrations are produced by strings (1)
Changing length of the string alters
the frequency of the sound produced (1)

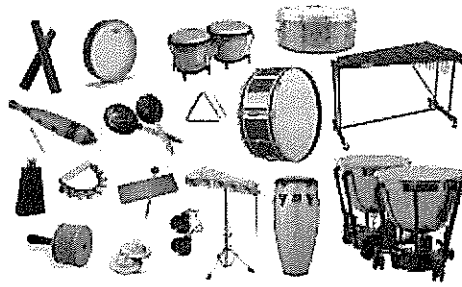

7. Explain how the group of instruments below produce sound. (2 marks)

A column of air vibrates (1)
The length of vibrating column
alters depending on which holes
are covered (1)

8. Explain how the group of instruments below produce sound.

(2 marks)

The instrument usually vibrates itself (2)

9. Look at the photograph of the living room below.

(3 marks)

a) List something in the room that absorbs radiated heat.

couch, cabinet, carpet

b) List something in the room that reflects radiated heat.

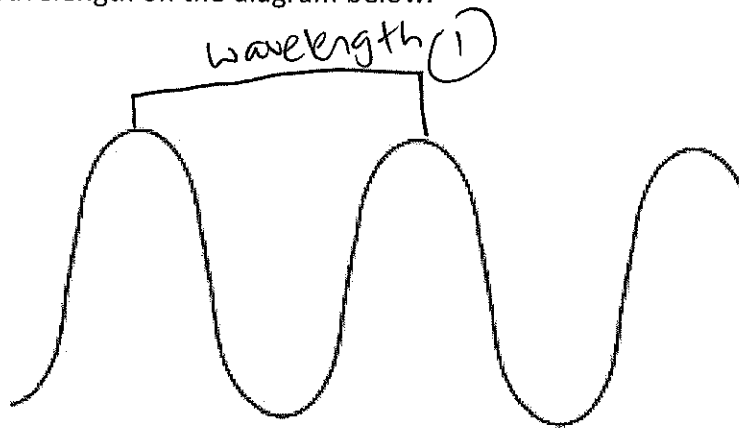

mirror

c) List something in the room that transmits radiated heat.

windows, coffee table

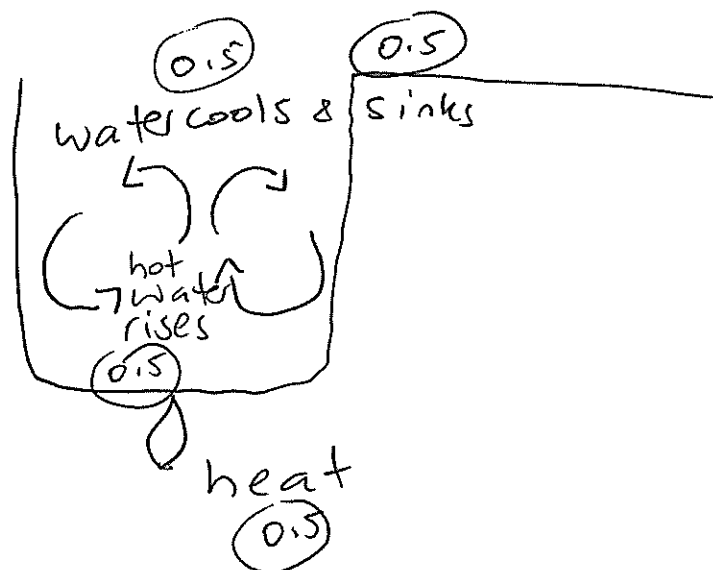

10. Label one wavelength on the diagram below.

(1 mark)

11. Draw a labelled diagram that shows how convection works in a pot of boiling water.

(2 marks)

12. State the unit used to measure frequency.

(0.5 marks)

Hertz

13. What is the type of wave demonstrated in the diagram below?

(1 mark)

Transverse wave
