

Year 11 Essentials
Mini Test 1.4
Volume and Capacity

Name: _____

Resources to be provided by the student: Calculator, a single sided A4 page of notes, ruler, pens, pencils

Total: /18

Weighting: 1%

Time: **20min**

1. [4 marks]

Choose an appropriate unit of measurement to describe the volume of the following items.

a) Refrigerator

m^3

b) Moving box

m^3

c) Takeaway food container

cm^3

d) Car

m^3

2. [4 marks]

Calculate the volume of the following 3D objects

a) A cube with edges of length 5cm

$$\begin{aligned} V &= L^3 \\ &= 5^3 \checkmark \\ &= 125cm^3 \checkmark \end{aligned}$$

2 marks

b)

$$\begin{aligned} V &= \frac{1}{2}bhL \\ &= \frac{1}{2} \times 10 \times 7 \times 9 \checkmark \\ &= 315cm^3 \checkmark \end{aligned}$$

3. [4 marks]

Determine the capacity of the objects in Question 2 in millilitres and litres.

$$\begin{aligned} \text{Cube} &= 125mL \checkmark \\ &= 0.125L \checkmark \end{aligned}$$

$$\begin{aligned} \text{Triangular Prism} &= 315mL \checkmark \\ &= 0.315L \checkmark \end{aligned}$$

4. [6 marks]

A fish tank has rectangular sides made of glass. It is 120 cm long and 70 cm wide. The water is 42 cm deep.

a) Sketch a diagram depicting this information.

b) How many cubic centimeters of water does the fish tank contain?

$$\begin{aligned} V &= L \times W \times H \\ &= 120 \times 70 \times 42 \quad \checkmark \\ &= 352800 \text{ cm}^3 \quad \checkmark \end{aligned}$$

c) If each litre of water occupies 1000 cm^3 , how many litres does the tank contain?

$$\begin{aligned} \text{Capacity} &= 352800 \div 1000 \quad \checkmark \\ &= 352.8 \text{ L} \quad \checkmark \end{aligned}$$
