## 11 HUMAN BIOLOGY HORMONAL REGULATION ASSESSMENT

MARK:

/25

NAME: ANSWER KEY TEACHER:\_\_\_\_

Full name of hormone  Gonad otropin releasing hormone  Mypothalamus  I production of hormone  Stimulates the synthesis 2 secretion of First and LH  Pollicle Stimulating hormone  In production of speumo Maintenance of corpus luteum during early Stages of pregnancy  Maintenance of corpus luteum during early Stages of pregnancy  Progesterone  Corpus luteum  Testosterone  Testosterone  Where it is secreted from Function of hormone Stimulates the synthesis 2 secretion of First and LH  Maintenance of corpus luteum during early Stages of pregnancy  Development of Function of Speumo Maintenance of corpus luteum during early Stages of pregnancy  Maintenance of Progesterone  Corpus luteum  Maintenance of Production of Speumo Maintenance of corpus luteum during early Secundary
FSH Follicle  In prothalamus  In production of speumo  Pituitary  In production of speumo  Pituitary  In production of speumo  Paturation of ovarian follicles of  Paralle reproductive syden  Corpus luteum  Progesterone  Testosterone  Corpus luteum  Testosterone  Corpus luteum  Testosterone  Corpus luteum  Testosterone  Corpus luteum  Testosterone  Progesterone  Corpus luteum  Testosterone  Corpus luteum  Testosterone  Testosterone  Progesterone  Progesterone  Corpus luteum  Testosterone
releasing hormone  hormone  hypothalamus  fractuction of speumo  production of speumo  naturation of ovarian follicles()  hormone  hormone
hormone  /** hypothalamus /**  Follicle Stimulating Production of speumo maturation of ovarian follicles (D)  HOG Human Chorionic gonadotropin placenta maintenance of corpus luteum during early stages of pregnoncy  Development of secundary sexual characteristics (D)  Progesterone  Corpus luteum maintenance of endometrium (D) sevelopment of secundary sexual characteristics (D)  Progesterone  Corpus luteum maintenance of endometrium (D) sevelopment of snille secreting glands (D) /**  Testosterone  Testosterone  Testosterone  Testosterone  Progesterone  August (Corpus luteum)  August (Corpus luteum)  Progesterone  Maintenance of endometrium (D) sevelopment of snille secreting glands (D) /**  Development of snille reproductive system (D) sevelopment of secondary sexual characteristics (D) /**  Testosterone  Testosterone  Testosterone  Progesterone  August (Corpus luteum)  August (Corpu
FSH Follicle  Stimulating hormone  HCG Human chorionic gonadotropin  Destrogen  Oestrogen  October Stimulating  An interance of corpus luteum. Sexual characteristics in Several maintenance of several maintenance of several maintenance of several characteristics in Several maintenance of endonetrium. The secreting glands in 12  Testosterone  Testoster
Follicle Stimulating hormone  HCG Human chorionic gonadotropin  Destrogen  Ovarian follicle  Corpus luteums  Corpus luteum  Progesterone  Corpus luteum  Testosterone  Testosterone  Follicle  Production of speumon  Naturation of ovarian follicles (I)  Maintenance of corpus luteum during early starges of pregnancy  Development of secondary sexual characteristics (I)  Progesterone  Corpus luteum  Maintenance of endometrium (I)  Secureting glands (I) /2  Development of smills  In secreting glands (I) /2  Development of male reproductive system (I)  Secondary sexual characteristics (I)  Luteinisting pituitary  Pituitary  Pituitary  Of testosterone (I)  Stimulates secretion
Follicle Stimulating hormone  HCG Human chorionic gonadotropin  Destrogen  Ovarian follicle  Corpus luteums  Corpus luteum  Progesterone  Corpus luteum  Testosterone  Testosterone  Follicle  Production of speumon  Naturation of ovarian follicles (I)  Maintenance of corpus luteum during early starges of pregnancy  Development of secondary sexual characteristics (I)  Progesterone  Corpus luteum  Maintenance of endometrium (I)  Secureting glands (I) /2  Development of smills  In secreting glands (I) /2  Development of male reproductive system (I)  Secondary sexual characteristics (I)  Luteinisting pituitary  Pituitary  Pituitary  Of testosterone (I)  Stimulates secretion
HCG Human chorionic gonadotropin placenta placenta waintenance of corpus luteum during early stages of pregnancy  Development of secondary sexual character is tics. In the stage of secondary sexual character of secondary sexual character of secondary sexual character of shilling placenta. In the stage of placenta of shilling productive system of placenta of shilling placenta. In the secondary sexual character of secondary sexual character of secondary sexual character is thics. In the secondary sexual character is the secondary sexual character
hormone  hor
HCG Human chorioric gonadotropin placenta maintenance of corpus luteum during early starges of pregnancy  Development of female reproductive system corpus luteum.  Progesterone  Corpus luteum.  Progesterone  Corpus luteum  Maintenance of endometrium.  Maintenance of endometrium.  Maintenance of endometrium.  Maintenance of placenta (D) sevelopment of smille secreting glands (D) /2  Development of male reproductive system.  Testosterone  Testosterone  Testosterone  Testosterone  Progesterone  Animale secretion  Of testosterone (D)  Stimulates secretion  of testosterone (D)
HCG Human chorionic gonadotropin placenta waintenance of corpus luteum during early starges of pregnancy    1
HUMAN Chorionic gonadotropin  placenta  perale repoductive system  perelopment of secondary  sexual characteristics in  progesterone  progesterone  Corpus luteum  progesterone  Corpus luteum  progesterone  Corpus luteum  progesterone  progesterone  Maintenance of  enclonent of secondary  sexual characteristics in  perelopment of smille  perelopment of male  reproductive system in  perelopment of  secondary sexual  characteristics in  progesterone  placenta  progesterone  progeste
Oestrogen  Ouarian folliscle Corpus luteum:  Progesterone  Corpus luteum:  Maintenance of endometrium (I) sevelopment of snille sevelopment of sev
Oestrogen  Ouarian folliscle Corpus luteum:  Progesterone  Corpus luteum:  Maintenance of endometrium (I) sevelopment of snille sevelopment of sev
Oestrogen  Ouarian follicle  Corpus luteurs:  Progesterone  Corpus luteur  Maintenance of endometrium of sevendary sexual characteristics of placeta of shilk several and of shilk several and of shilk reproductive system of sevendary sexual characteristics of placeta of shilk several and of shilk reproductive system of sevendary sexual characteristics of se
Oestrogen  Ovarian follite  Corpus luteums  Progesterone  Corpus luteum  Maintenance of endometrium () bevelopment of secondary  Sexual characteristics ()  Maintenance of endometrium () bevelopment emaintenance of placeta () bevelopment of smilk  / 1 secreting glands () /2  Development of male reproductive system ()  Development of secondary sexual characteristics ()  / 2  Luteinising hormone  Pituitary  Of testosterone ()  Stimulates secretion
Oestrogen  Ovarian follite  Corpus luteums  Progesterone  Corpus luteum  Maintenance of endometrium () bevelopment of secondary  Sexual characteristics ()  Maintenance of endometrium () bevelopment emaintenance of placeta () bevelopment of smilk  / 1 secreting glands () /2  Development of male reproductive system ()  Development of secondary sexual characteristics ()  / 2  Luteinising hormone  Pituitary  Of testosterone ()  Stimulates secretion
Progesterone  Progesterone  Corpus luteum  Corpus luteum  Maintenance of endonetrium (1) bevelopment of snille sevelopment of snille sevelopment of male reproductive system (1)  Testosterone  Testos
Corpus luteums  Progesterone  Corpus luteum  Maintenance of endonetrium() bevelopment emaintenance of placeta () bevelopment of smille  /1 secreting glands() /2  Development of male reproductive system()  Development of secondary sexual characteristics ()  Luteinising hormone  Progesterone  Corpus luteum  Maintenance of endonetrium() bevelopment of smille reproductive system()  Development of secondary sexual characteristics ()  /1 stimulates secretion  of testosterone ()  stimulates secretion
Progesterone  Corpus luteum  Maintenance of endonetrium () bevelopment emaintenance of placeta () bevelopment of smille  /1 secreting glands () /2  Testosterone  Testosterone  Testosterone  Luteinising hormone  Luteinising  Pituitary  Pituitary  Sexual characteristics ()  Progesterone  Maintenance of endonetrium () bevelopment of smille reproductive system ()  Development of male reproductive system ()  Sevendary sexual characteristics ()  Posterone  Pituitary  Pituitary  Stimulates secretion  Of testosterone ()  Stimulates secretion
Progesterone  Corpus luteum  Maintenance of endometrium(D) sevelopment & maintenance of placenta (D) sevelopment of smilk secreting glands(D)/2  Testosterone  Testosterone  Testosterone  Luteinising hormone  Progesterone  Corpus luteum  Maintenance of endometrium(D) sevelopment & maintenance of placenta (D) sevelopment of maile reproductive system(D)  Development of maile reproductive system(D)  Secretion  Stimulates secretion  Stimulates secretion  Stimulates secretion
Progesterone  Corpus luteum  Maintenance of endometrium(D) sevelopment & maintenance of placenta (D) sevelopment of smilk secreting glands(D)/2  Testosterone  Testosterone  Testosterone  Luteinising hormone  Progesterone  Corpus luteum  Maintenance of endometrium(D) sevelopment & maintenance of placenta (D) sevelopment of maile reproductive system(D)  Development of maile reproductive system(D)  Secretion  Stimulates secretion  Stimulates secretion  Stimulates secretion
Corpus luteum  endonetrium (1)  sevelopment emaintenance of placeta (1)  sevelopment of smilk  secreting glands (1) /2  Development of male reproductive system (1)  Development of secondary sexual characteristics (1)  Luteinising hormone  pituitary  of testosterone (1)  stimulates secretion
Testosterone  Te
Testosterone  Te
Testosterone  Testosterone  testis  testis  Development of Milk  secreting glands() /2  Development of male reproductive system()  Sevelopment of secondary sexual characteristics ()  /2  Luteinising hormone  pituitary  of testosterone()  stimulates secretion of testosterone()
Testosterone  testis  testis  pevelopment of male reproductive system to seven dary sexual characteristics ()  the Luteinising hormone  pituitary  pituitary  pituitary  stimulates secretion  of testosterone ()  stimulates secretion
Testosterone  testis  bevelopment of male reproductive system ()  Development of secondary sexual characteristics ()  Luteinising  hormone  pituitary  of testosterone ()  stimulates secretion  of testosterone ()  stimulates secretion
testis  testis  testis  reproductive system to  Sevelopment of  secondary sexual  characteristics (1)  /1  Luteinising  hormone  pituitary  of testosterone (1)  stimulates secretion  of testosterone (2)
Development of secondary sexual characteristics (1)  Luteinising pituitary of testosterone (1)  Aland stimulates secretion
Luteinising pituitary of testosterone ()  Aland stimulates secretion  of testosterone ()
hormone pituitary of testosterone ()
hormone pituitary of testosterone ()
hormone pituitary of testosterone ()
hormone pitultary of testosterone ()
aland stimulated secretion
of soul of
OF OF THE PARTY
